District Projects and Operations

Communications Report

The quarterly communications report is complete, and a subsequent quarterly newsletter was released last month. Work on next quarters communications report is underway.

Devils Lake Conservation/Aeration Project

All equipment is fully operational and maintained per schedule

Devils Lake Aquatic Vegetation Management

Pilot Herbicide treatments for nuisance submerged aquatic vegetation began 6-13-2022. It may take up to 10 weeks to see visible results. Staff is currently monitoring any changes in water quality and vegetation density.

The most recent ODFW commission was attended by DLWID staff Joshua Brainerd. DLWID staff prepared a statement and presented it to the ODFW Commission at their August 5th meeting. The statement requested the

commission to allow DLWID to re-stock sterile grass carp in Devils Lake. The commission has placed the item on their agenda for upcoming meetings. They have indicated a rule change will likely be necessary to allow the re-stocking.

Preliminary estimates from the ODFW approved supplier of triploid grass carp have been requested. The approved supplier is in Arkansas.

Devils Lake Flood Protection

Civil West has completed the design for sediment laydown pad. Awaiting Biological Assessment completion.

ACTION ITEMS

Campbell Environmental to complete Biological Assessment.

Water Quality Briefing

Dissolved oxygen levels remain high lake wide. Some potentially problematic algae have been identified within the water column.

E. coli general update and discussion summary, major reductions in detections continue since the installation of the aeration system.

New Business

Status of marina property

General discussion of temporary office options

Accounting expense increase

General Discussion of Tax Levy
